Field of study

Why we need an Expert Finder App?

- There are **many experienced and young scientists** coming and leaving the community
- Some experts are **changing topics** and tracking is a challenge
- App should be **aligned with EFSA** expert database and the **EU Commission** expert database
- It is a **part of the FoodSafety4EU platform** and is one of several supporting apps
- It's a public database showing the community and **making the community visible**
- **Open Science** means also **open information about experts**

THANK TO ALL
